WORK EXPERIENCE

Automation Engineer Intern - Automation Rabbit | Austin, TX
May 2025 - August 2025

- Gained hands-on expertise with n8n, Vapi, Replit, and API integrations, building strong skills in workflow automation, JSON formatting, and LLM prompt engineering.
- Solved API errors, broken integrations, and data schema issues by creating workarounds and restructuring JSON flows.
- Contributed to client landing pages and internal workflows; built personal projects such as an AI clip generator and automated social posting tools.

IT Technician Intern - Dyezz Surveillance | Austin, TX
January 2025 - May 2025

- Performed diagnostics, system resets, firmware updates, and network configuration across routers, switches, and servers.
- Managed DNS records, resolved connectivity issues, and configured IP/analog cameras and DVR/NVR systems.
- Completed objectives with minimal instruction in a high-paced environment.

Cybersecurity Intern - Hurley Piano | Austin, TX
January 2025 - May 2025

- Secured cloud platforms and CMS environments by configuring accounts and applying access controls.
- Implemented intrusion prevention measures, installed security plugins, and conducted vulnerability assessments.
- Built and documented a sustainable cybersecurity framework that improved long-term organizational posture.

EDUCATION

Austin Community College

-BAS Cybersecurity
Aug 2023 - Present

-AAS LAN
Security/Administration
Aug 2023 - Present

SKILLS

Networking: TCP/IP, DHCP, DNS, VLANs, Routing & Switching, Firewalls

Cybersecurity: Active Directory, IAM, Incident Response, Vulnerability Assessment

Tools: Wireshark, pfSense, Cisco IOS, VMware

Operating Systems: Windows Server, Linux (Ubuntu/Kali)

Programming/Scripting: Python, Bash/PowerShell

Cloud Platforms: AWS (EC2, IAM, security fundamentals)

Security: Endpoint Hardening, Network Security (IDS/IPS, SIEM, firewalls)

CERTIFICATIONS

A+ (09/01/2025)

Network+ (in progress)

Security+ (planned)
